Weekly Accomplishments

The student trainee should give a summary of the tasks performed during the week and how it was accomplished.

Last week was our sixth week in OJT, and it mostly felt like a normal set of days in the office. Every morning, we started by getting the computers ready and checking if everything was working as expected before doing anything else.

We spent most of the week focusing on the unfinished paperwork from the previous days. It took some time, but we made sure to go through everything carefully so we could finally complete all the remaining tasks.

One thing that stood out during the week was when we ran into a problem with one of the computers. It suddenly couldn't connect to the internet, so we decided to check what was wrong. After looking into it, we found that the LAN cable was damaged near the port. We tried to fix it, and luckily, after testing it again, the connection came back and the computer was working fine.
