Weekly Accomplishments

The student trainee should give a summary of the tasks performed during the week and how it was accomplished.

Last week was our seventh week in OJT, and it continued to feel like part of our regular routine in the workplace. Each morning, we started by preparing the computers and checking if all systems were functioning properly before beginning our assigned tasks. This daily routine helped us stay organized and ensured that everything was ready for the day's work.

Throughout the week, we were assigned to assist with organizing files and updating records in the system. It required attention to detail, as we had to make sure that all information was accurate and properly encoded. Although the tasks were repetitive at times, they helped us improve our efficiency and familiarity with the workflow in the office.

Another notable experience during the week was when we assisted in basic troubleshooting for a slow computer. We checked the running programs and found that too many applications were open at the same time, which affected its performance. After closing unnecessary programs and restarting the computer, its speed improved and it was able to function normally again.
